Projected Area: 18.453 in²**

Total Unit weight (including screws) .367 lbs.

**Baseplate and Cover are 100% LEXAN
(940A Polycarbonate)**

The LDM11-13 model fits all standard duplex electrical outlets. The baseplate is mid-sized, allowing for cover-up of wall imperfections around the receptacle. The space under the cover is also larger than on our small-baseplate models, allowing for larger and wider plugs. The extra large cover on this model will fit over most oversized electrical plugs including computer cables, power strips and heavy-duty appliances.
