Flat Cover - Duplex Style (LDM1-7)

The LDM1-7 model fits all standard duplex style electrical outlets. The baseplate is mid-sized, allowing for cover-up of wall imperfections around the receptacle. The flat cover is intended to prevent the outlet from being used. Although the cover snaps into place by hand, a tool (such as a screwdriver) is required to remove it. This device offers a semi-permanent means of removing outlets from use without actually removing the wiring or receptacle as is required with a standard blanking plate.

Standard Cover – Duplex Style (LDM1-2)

The LDM1-2 model fits all standard duplex style electrical outlets. The standard-size cover will fit over most household electrical plugs including table/floor lamps, stereo equipment, and small electrical appliances. The baseplate is mid-sized, allowing for cover-up of wall imperfections around the receptacle.

Large Cover - Duplex Style (LDM1-3)

The LDM1-3 model fits all standard duplex style electrical outlets. The baseplate is mid-sized, allowing for cover-up of wall imperfections around the receptacle. The space under the cover is also larger than on our standard models, allowing for larger and wider plugs. The extra large cover on this model will fit over most oversized electrical plugs including computer cables, power strips and heavy-duty appliances.
